Career Objectives

Website developer with an expertise in working in React. Seeking a position where I can use, learn, and grow my front-end abilities and furthering my understanding of back-end skills to eventually work in full-stack development. Seeking full-time employment for the immediate future.

Relevant Courses

The Frontend Developer Career Path|Scrimba

Completed: March 2022

These courses taught the basics of HTML, CSS, JavaScript, React, UI design, Responsive design, and working with APIs.

Explore React.js Development|Linkedin Learning

Completed: August 25, 2023

These courses taught a solid foundation in React, such as; accessibility in React, authentication in React, server-side rendering, hooks in React, and how to create and host a full-stack site.
